

Remote Kimberley Catchment Issues:

A discussion spurred on by the Kimberley group for biosecurity wishing to terminate the [Kachana Wild Donkey Project](#) has now gone public.

Some of the discussion [can be tracked via Face Book](#) accompanied by the inevitable “noise” that gets produced when attempting to discuss complex processes in bite-size transmissions.

(How would one discuss the merits of Algebra with pre-schoolers?

We suspect that caring school teachers would do a better job than most mathematicians.

How does one discuss the merits of effective eco-system processes with uninformed people living in cocoons of modern luxury?

Accordingly, we ask any caring educators who may be monitoring this discussion to intervene on our behalf. THANK YOU!)

Listed below is the unfolding discussion as we see fit to report to land-managers and informed decision-makers:

[2018 - May 03rd - Cull-intention letter signed by Mike](#)

[2018 - May 22nd - KPC letter to Mike and fellow land managers](#)

[2018 – May 22nd - KPC mail-out to network](#)

[2018 - May 24th - KPC ad in the Kimberley Echo](#)

[2018 - May 26th - P.&C. C. \(Kalyeeda Station\) letter in support](#)

[2018 - May 27th - Kimberley group for biosecurity email to membership](#)

[2018 - May 28th - KPC response to the email of the 27th May](#)

[2018 - May 28th - E.L. \(scientist\) response](#)

2018 - May 29th – Contribution from P.D.: different species, different continent, similar discussion:
[Are wild horses being managed to extinction?](#)

[2018 - June 04th – KPC: Australia's New Megafauna – Problem or Solution?](#)

Time permitting, we will update this page.

Below, for reference purposes, please find an incomplete list of other links to information that is relevant to the discussion:
